ELECTRICITY AND MAGNETISM CONCENTRATION

current	flow of electricity	motor	device that changes electricity to kinetic energy	series circuit	circuit with just one pathway of electricity
circuit	path of electricity	buzzer	device that changes electricity to sound energy	parallel circuit	circuit with more than one pathway of electricity
switch	device that opens and closes a circuit	open circuit	circuit that **does not** have a complete flow of electricity	poles	strongest parts of a magnet
bulb	device that changes electricity to light energy	closed circuit	circuit that **does** have a complete flow of electricity	attract	to pull together
repel	to push apart	schematic diagram	a way of drawing a circuit using specific symbols for electrical components	electro-magnet	magnet that can be turned on and off

Vocabulary Concentration Rules

1. Cut cards apart along the lines.
2. Shuffle the cards.
3. Arrange the cards face down, in rows.
4. Turn over two cards. If the cards match, go again. If the cards don't match, it becomes the next player's turn.
5. The game ends when all of the cards are matched.
6. The player with the most matched cards wins.
